PROFESSIONAL SUMMARY

IT and data professional with 11+ years of experience in large-scale system deployments, data integration, and user-focused IT solutions. Hands-on expertise in PL/SQL/Oracle, PostgreSQL schema design and performance tuning, Python/SQL for ETL, and infrastructure-as-code deployments (Docker, AWS, Terraform) with CI/CD pipelines. ISC2 Certified in Cybersecurity; skilled at translating technical requirements into operational systems and producing concise stakeholder reports.

EDUCATION

Master of Science, Applied Information Technology – 3.96 GPA	December 2025
Towson University, Towson, MD	
Post Graduate Degree, Management and Information Systems	January 2019
University of Roehampton, London	
Bachelor of Science, Computer Science	July 2011
Covenant University, Ota, Nigeria	

TECHNICAL SKILLS

- **Databases & Query Languages:** Oracle (PL/SQL), PostgreSQL, MySQL, Microsoft SQL Server, SQL
- **Programming & Scripting:** Python, C++
- **Cloud & DevOps:** Docker, AWS (EC2), Terraform, CI/CD, Git
- **Tools & Platforms:** Oracle SQL Developer, pgAdmin, SQL Server Management Studio (SSMS), SharePoint, OneDrive, Zoho CRM
- **Data & Visualization:** ETL scripting, Power BI, Tableau

RELEVANT EXPERIENCE

Farm-to-Food Bank Database System: Oracle 23ai, PL/SQL, Oracle SQL Developer	Ongoing
• Designed and implemented a database-driven system to manage farm produce donations, pantry distribution requests, and perishable inventory, leveraging PL/SQL procedures, triggers, and scheduler jobs to enforce business rules, automate alerts, and maintain data integrity.	
Product Catalog Web Application: Flask, PostgreSQL, Docker, AWS EC2, Terraform, CI/CD	June 2025
• Designed, containerized, and deployed a full-stack e-commerce catalog with user authentication, image uploads and role-based CRUD; provisioned infrastructure via Terraform and integrated CI/CD pipelines to automate deployments and improve release reliability.	
Bank Database System: PL/SQL, Oracle SQL Developer	May 2025
• Engineered a simulated banking platform using PL/SQL procedures, triggers, and packages to automate account creation, transaction processing, and data validation, enforcing business rules and improving data integrity for simulated workloads	
Health Management Project (Team Member)	December 2024
• Collaborated with a 3-person team to design and deploy a health data management solution for a hospital, contributing to schema design, input validation, and data normalization.	
Major Deployments (SystemSpecs / Government Projects)	January 2013 – July 2021
• Led large-scale treasury and payroll system deployments across multiple Nigerian states, coordinating configuration, user training, and post-deployment support to ensure adoption and operational continuity.	

WORK EXPERIENCE

Med. ELED Program Graduate Assistant	August 2024 – May 2025
Towson University Department of Elementary Education – Towson, MD	
• Maintained and enhanced three education program websites, improving information accessibility. • Designed and published digital newsletters and promotional content using Canva. • Organized course materials and program files in OneDrive, streamlining document access for faculty and improving program efficiency.	

- Monitor and respond to maildrop emails for the MEd ELED program; assist with follow-up emails and announcements for multiple cohorts and virtual information sessions.

Customer Experience Manager, Special Projects

August 2021 – April 2024

Remita Payment Services Limited – Abuja, Nigeria

- Led data integration and normalization efforts across financial platforms, ensuring accuracy in electronic payment processing.
- Produced compliance reports for regulators and law enforcement using datasets exceeding 1 million records, improving turnaround time.
- Recruited, onboarded, and trained a 27-member customer experience team; implemented performance metrics that improved service ratings.
- Developed SOPs that reduced customer complaint resolution time and improved team consistency in service delivery.
- Analyzed extensive data sets to generate detailed reports in response to inquiries from regulators and law enforcement agencies, ensuring compliance and accuracy in reporting.
- Developed and implemented standards and procedures for ensuring optimal customer experience.
- Monitored the activities of the customer experience team of 27 to ensure compliance with acceptable standards of customer service.
- Conducted studies and research to discover new techniques necessary for improving customer experience.
- Interfaced with customer relationship management (CRM) tools like Zoho CRM in coordinating and monitoring customer experience operations.

Customer Experience Manager, Public Sector Solutions

May 2019 – July 2021

SystemSpecs Limited – Abuja, Nigeria

- Directed end-to-end deployment and support of financial applications across 3 state governments, ensuring adoption and operational uptime.
- Streamlined payroll processing for civil servants in 3 states, reducing salary disbursement delays through automation and system integration.
- Collaborated with internal stakeholders such as customer service executives and other customer-facing teams to identify gaps and opportunities, if any in the brand experience.
- Supervised the activities to ensure the customer experience strategies are aligned to the larger business goals and outcomes.
- Collected, monitored and analyzed customer feedback and suggest improvements internally based on the insights gathered – help measure metrics to gauge how the brand is performing on customer experience performance parameters.
- Developed and implemented standards and procedures for ensuring optimal customer experience.
- Interfaced with customer relationship management (CRM) tools like Zoho CRM in coordinating and monitoring customer experience operations.

Technology Deployment and Support Team Lead

January 2017 – April 2019

SystemSpecs Limited – Abuja, Nigeria

- Spearheaded deployment of financial systems across 3 Nigerian states, impacting over 5,000 public sector users and managing a 13-member tech team.
- Delivered 20+ user training sessions, resulting in improved user adoption scores and reduced post-implementation support tickets.
- Coordinated implementation priorities and workflow on the financial application for organizations.
- Supported users of the financial application over the telephone and by email.
- Configured and tested the financial application deployed to customers.

Technology Deployment and Support Member

March 2013 – January 2017

SystemSpecs Limited – Abuja, Nigeria

- Led the deployment team of 7 for a period of 2 years in the implementation of the financial application to the Federal Government of Nigeria
- Trained over 2,000 end users in the use of the financial application software
- Coordinated implementation priorities and workflow on the financial application for organizations.
- Supported users of the financial application over the telephone and by email.
- Configured and tested the financial application deployed to customers

CERTIFICATIONS AND TRAININGS

- | | |
|--|---------------|
| • AWS Certified Cloud Practitioner, Amazon Web Services | October 2025 |
| • Certified in Cybersecurity (CC), ISC2 | August 2025 |
| • Data Analysis Boot Camp Training, Analyst Builder | May 2024 |
| • ISO 27001 – Information Security Training | July 2017 |
| • ISO 9001 – Quality Assurance Training | June 2015 |
| • Oracle Certified Administrator OCA I | May 2010 |
| • Oracle SQL Expert | December 2009 |
| • Extra-legendary Customer Service Training, Bezaleel Consulting Group | May 2019 |
| • Project Management Professional Training, Jeman Consulting, Abuja | August 2010 |

VOLUNTEER EXPERIENCE

- | | |
|---|-------------------------|
| Chen Teen & Youth Development Initiative – Mentor / Volunteer | December 2018 – Present |
| • Organized workshops and outreach programs; mentored youth and coordinated volunteer activities. | |
